There are two standard tours that explore the heart of Kansai. The 7-day or 4-day tour. Both offer a cycling advneture that visits the iconic Kyoto, Nara and Osaka. The longer tour includes the seaside of Wakayama with slightly more challenging riding, with rewarding views. These tours are NOT for those chasing a cycling record, these are designed to immerse you in the countryside and local neighbourhoods of Japan. Navigating the narrow backstreets and pathways. stopping to enjoy amazing restaurants along the way at a liesurely pace. If you are in Japan for two or more weeks we recomend the 7-day tour as a way to truly experience the Kansai region. If you are in Japan for one week to 10 days, try the 4-day tour. Cycling is the best way to see the local lifestyle smell the fragrant blossoms and fully experience for yourself the local culture.

Cycling in Japan

When is the best time to cycle in Japan?

The best time to cycle in the Kansai area of Japan is Spring (Mar to May) or in the Autumn (Sep to Nov). When we go! This time of the year offers

- the best tempatures ~15-25 degrees celcius.
- beautiful colors including cherry blossoms to fall leaves.
- least chance of heavy rain or typhoons.
- Most local festivals occur in the spring or fall.

Escape the Canadian winter with a special adventure. Book your spring cycle adventure and get 10% off with Promo code **WinterBreak10**
